

### Product sheet

The fertilizer **INV-101 X** is part of a complete plant nutrition program, it is the third part of three formulations.

Its main role is to provide an excess of **Phosphorus** and **Potassium** at a crucial time in your culture calendar. This addition optimizes the development of flower stalks and promotes weight gain.

By modifying the N-P-K ratio, we limit at the same time the vegetative growth which allows the plant to reach its full floral development. To do this we take the Mono-Potassium Phosphate and add to it the Magnesium Nitrate in order to supplement the **Magnesium** required during this important physiological period.

GUARANTEED ANALYSIS	1-2-2
Total nitrogen (N) .....	1%
1% Nitrate nitrogen	
Available Phosphate (P <sub>2</sub> O <sub>5</sub> ) .....	2%
Soluble Potash (K <sub>2</sub> O) .....	2%
Magnesium (Mg) .....	0.2%
<b>DERIVED FROM</b>	
Magnesium nitrate, monopotassium phosphate, potassium sulfate	

#### Usage

Concentrated liquid fertilizer, intended for use in greenhouses and urban gardens. To know the dosage, refer to the fertilization charter of your culture.

#### Storage

Store in a cool dry place, protected from frost and sun exposure.

#### Sécurité

Wear appropriate protective equipment during handling. Keep out of reach of children and animals. In case of contact with eyes, rinse thoroughly with water and consult a physician. Do not swallow.

#### Available formats

1L - 4L - 20L - 200L - 1000L

#### Density

1.1 kg/L

#### MADE IN CANADA

Manufactured by  
 Laboratoire In vivo Inc.  
 104 chemin du Ruisseau, Lac-Simon, QC, J0V 1E0
